

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

INDEX

TO THE

THIRD TEN VOLUMES OF THE JOURNAL OF THE ROYAL
GEOGRAPHICAL SOCIETY.

ABADAN.

A.

- ABADAN Island, Euphrates mouth (*Mesene*; *Apphana* of Ptolemy; *Appadan* of Marcianus), xxvii. 188.
- ABAGAITU on the Argun, Russo-Mongol frontier, xxviii. 414.

Tintellust and Agadez, xxi. 163.
- ABEIH, near Beirut, American Mission
School at, xxiv.
- ABERNETHY, Icemaster of the *Isabel*
xxiii. 139.
- ABHICATE (for *Ab-i-Haiyat*), Canal in
Irak, xxx. 205.
- ABICH, Prof. H., On country between
CASPIAN and BLACK SEAS, xxi. 1—
extraordinary diversities of climate;
great cold of Steppe between Cas-
pian and Aral. Caucasus, its general
character and geology; three inde-
pendent volcanic regions north of
Central chain, 2—south of the chain;
granite ridge called by Strabo "knee
of Caucasus," dividing Colchis from
Iberia; Armenian Highlands or
Lower Caucasus, 3—parallel chains
of volcanic vents on either side of
Araxes; different heights of snow-
line in Upper and Lower Caucasus,
4—great deflexion of Isothermals to
the south on reaching the Caspian, 5
—great discrepancy in mean tem-
perature of seasons, in different places
of this tract, and consequent astonish-
ing variety of production. Occa-
sional great winter cold on the Cas-
pian, strong summer heat and con-
sequent peculiar vegetation, 6—
Baku, warmer in summer, milder in
winter than Lenkoran, with five
times the rainfall; causes; change of
climate south of the Kur by destruc-
tion of woods, 7—contrast of moist
and wooded Imeretia and Mingrelia,
sheltered by Caucasus and Meskian
mountains, with Caspian Georgia.
Intermediate position of Tiflis, 8—
west of this the insular climate of
southern Europe, east of it the con-
tinental climate of Asia; the latter
character with its extremes increases
in approaching Armenian Highlands;
climate of Ararat; Alexandropol
compared with Canada, closely ap-
proaching it in temperature of the

ACHO.

- seasons. Great dryness of the air in
high plain of Armenia, 9—intense
evaporating power and bearing upon
health. Relation of the winds to
this.—*Meteorological Tables*, 11, 12.

- BOLLAERT, W., Observations on the Geography of SOUTH PERU, with survey of TARAPACA, and route to Chile, by coast of ATACAMA DESERT, xxi. 99—the author's opportunities of knowledge; journey from Valparaiso, 100—winds at different seasons; Arica; Jacora; hopeless aridity; rainlessness. Port of Islay, chief one of Arequipa, a mere rocky landing; ascent to Arequipa; first to the great Pampa or high desert plain; *Medanos*, or concave moving sandhills, 101—barren

BOLLAERT.

hills; then Arequipa at base of its volcano. Earthquakes and eruptions; province of Tarapaca, 102—first Spanish discovery by 'Almagro in 1537; barren character.

Physical Features.—I. Arid Coast Mountains; II. Pampa, great plain of Tamarugal, 103; III. Desert range of mountains; IV. Elevated district with pastures and brushwood; V. Western Cordillera; VI. Elevated undulating region of the Puna, Parí, Sierra, or great mountain knot of Potosí, the seat of much volcanic action, but little known, survey by G. Smith, 104—boundaries and divisions of the province; taxation; *Curatos* or districts:—

I. *Tarapaca*; effect of storms; produce; rumbling mountain; sundry details, 105—port of Iquique; signs of recent upheaval of the coast; water brought 45 miles, 106—absence of rain; seabirds and guano; fishermen and their *Balsas*; consumption of tobacco; prospects of mineral wealth, and places named of promise in that way, 107—silver-mines of Guantajaya; details, 108—mines of Santa Rosa and El-Carmen, 109—curious Indian works called *Las Rayas* and *Pintados* on the hill-sides; salt deposits and speculations as to their origin, 110.

II. *Pica*, on east of the Pampa; water scanty, from thermal springs, 111—*socabones*, or subterranean adits, driven into rising ground, of great length. Vegetable produce; houses of sun-brick and bamboo; ague and remedies; earthquakes; insect plagues; Matilla; Pampade Tamarugal, from the *Tamarugo*, the only fruit-tree; dead-wood deposits found under the soil, 112—wells in the Pampa not salt; ravines or *Quebradas* from the Andes; mirage; whirlwinds and sandstorms, 113—La Tirana; experiments in cultivation; nitrate of soda; details, 114—Quebrada de los Pintados with Indian figures on the hill-side, 115—guano deposit; gold and silver mines of Chanabaya, 116.

III. *Curato* of *Sibaya*, *Angosturas*, singular fissures, narrow and deep; Indian hamlets, llamas; cactuses; steep and dangerous tracks.

IV. *Camíña*, 117—port of Pisagua; mineral products; ancient Indian cemetery, 118—route from Camíña to

BOOMERANGS.

Isluga, with details; volcano of Isluga, 119—names of other volcanoes; town of Isluga in the Cordillera; the frozen potato, and liquor made from it; animal life; the puma and condor; fuel. Salt Pampa east of Isluga, said to be 40 leagues long; . . . Volcanitos (or Geysers) of Puchultisa, 120—the burrowing *Viscacha*; Chiapa; Devil's Road.

Ascent of the mountain of Tata Jachura, 121—height, 17,000 ft.; view of the Andes; animals seen.

Indians of Tarapaca; speak Aymarra, 122—christianized; position better since separation from Spain; character; food; coca; houses; dress, 123—women; travelling doctors.

Description of the sections accompanying the Paper, 123-125.

Earthquakes, 126.

Route by the coast from Cobija to Coquimbo, with observations on the meteoric iron of Atacama, 126-129—analyses of the iron, 130.

III. *Progress into the Interior.*—Leave Zanzibar, 220—Bagamoyo; Zungomero, 221—Goma Pass; fever; letter from Speke from Zungomero; remarks on the route, 222—latitudes fixed, 223—communication from Unyamwebe, 224—letter from Burton to Mr. Galton on equipment of the expedition, 224.

The LAKE

REGIONS of Central Equatorial AFRICA, with Notices of the LUNAR MOUNTAINS, and the Sources of the WHITE NILE; being the results of an Expedition undertaken, under the patronage of Her Majesty's Government and the Royal Geographical Society, in the years 1857-59; vol. xxix. (the whole).

Preface. I. Early Discovery, 1—the Mombasa missionaries, 2—Publications on the Lakes, by Mr. Cooley and others, 3.

BURTON.

II. Capt. Burton's project, 4—instructions from the Royal Geographical Society; memoranda on instruments, 7—preparations and preliminaries, 8-11.

III. Zanzibar, 11—death of Sayyid Said, Sultan of Maskat and Zanzibar; illness of Col. Hamerton, Resident at Zanzibar, 12—obliged to give up Mr. Rebmann's company; Burton and Speke both attacked by fever, 13.

IV. Rainy season at Zanzibar, 13—engagement of attendants, &c.; heavy expenses, 14—death of Col. Hamerton, 15—his character and kindness, 16.

V. Personnel of the expedition, 16; and abstract of their proceedings on the journey.

VI. Return to Zanzibar, and state of things there, 18—departure to Aden, 19—remarks on narrative; distance travelled over new ground, 20—expenses; observations and collections; the map, 21.

NARRATIVE. Chap. I. *General Remarks. Eastern Intertropical Africa South of the Equator.* Preceding theories of formation of Central Africa, 21—Sir R. Murchison's view, and its confirmation, 23—general description of the conformation of the regions which are the subject of the narrative, 24—five geographical regions to be traversed, 27—nature of tracks, 28—water-partings, 29.

Chap. II. *The Coast of Zanzibar, the Mrima, and its Population.* Names at different periods, 30—maps and errors, 31—roadsteads, tides, and currents, 32—description of the Mrima coast; vegetation, 35—climate, 36—endemics; fevers, 39—other diseases, 42—rivers; settlements, 45—races, 48—legendary history, 50—half-caste Arabs, 53—coast clans, 55—chiefs, 56—porters, 58.

Chap. III. *The First Region; the Valleys of the Kingani and the Mgeta Rivers.* Character of these fluvial valleys, 59—climate and diseases, 61—start from Kaolé opposite Zanzibar, 62—vegetation, 63—Nzasa, 64—the Kingani, 65—Kiranga-Ranga, 66—graves, heathen and Moslem; game, 67—the Mgeta River, 71—Enter Khuta, 72—constant rain, 37—Duthumi, 74—Usagara mountains, animals, 75—Malarious region of Zungomero, 76—caravan station, 78—

BURTON.

nature and cost of supplies, 79—Buccaneering violence, 80—Usagara mountains, 81—delightful change in leaving the low, wet country, 82. *Ethnology*: the Wazaramo, and their peculiarities, 83—features, hair-dressing, Albinos, dress, weapons, 83-86—habitations, 86—character, 87—chiefs, 88—brother oath, 89—*Adá*, or custom, 90—customs in regard to children, 90—marriage and divorce, 92—industry, 93—murder of M. Maizan, 93-96—the Wakhutu, 96—the Wadoe, 99—the Wazegura, 100.

Chap. IV. *The Second Region; the Mountains of Usagara in the East African Ghauts.* The mountain region, 101—surface geology, 101—flowers and fruit, 103—water, 104—climate, 105—diseases, 106—*Northern Route to Ugogi*, 107—Tamarind hills; Rufuta river, 108—Muhama, 110—Makata, 111—contrasts of scenery, 112—River Mukondokwa, 113—the Tsetsé fly; Rumuma, 116—water-melons and the like, 117—the Rubeho mountains, 118—the *Tirikeza* or afternoon march; Inenge, 119—Pass over the Rubeho; counterslope of the Usagara, 120—Ugogi, the half-way to Unyanyambe, 123. *Southern Route to Ugogi*, called Kiringawana, 124—the Mabruki Pass; Ruhembi river, 125—Kisanga; the chief called Kiringawana, 126—Maroro, 127—Rudi, 128—Ugogi, 129—the Wasagara, or people of these mountains, 130—their hairdressing, clothing, &c., ornaments, the wire coil, 132—the *Tembe* or hut, 133—vermin, 134—interiors, 136—the Wahehe, 137.

Chap. V. *The Third Region; the Plateau of Marenga Mk'hali, Ugogo, and Mgunda Mk'hali.* Flat tableland, 139—Ugogo, its arid climate, 140—fever, 142—the Baobab-tree, 142—frankincense; Euphorbiae, 143—large animals and birds, 143-145—three main roads across the desert of Marenga Mk'hali, 145—Ziwa, 146-148—*Kuhonga*, or exactions of Black Mail, 148—provisions procurable, 150—Kifukuro and its Sultan, 150—Kanyenye district, 151—to Khokho, 152-154—evidences of ignominious action, 153. Great desert of Mgunda Mk'hali, 155—aspect, surface, water, 156—the Wagogo, 159—language, 161—the Wahumba, 164.

Chap. VI. *The Fourth Region; the*

BURTON.

hilly Table land of Unyamwezi and Eastern Uvinza. Extent and altitude, 165—the name of Unyamwezi and many errors about it, 166—tradition of a great empire, 168—provinces, 169—character of country; pleasing evening aspect, 170—climate and seasons, 171—fevers, 175—fauna, the Tsetsé, 177—Kazeh, or Ihara, in Unyamwezi, 179—the meeting-place of the caravans here; Arab merchants residing here, 181—their houses, 182. Routes to Lake Tanganyika: *Northern*, Yombo, 186—Kirira, 187—Mscene, the Bunder or rendezvous of trade and coast Arabs in Western Unyamwezi, 188—productions, 189—intoxication, 190—Sorora; Usagozi, 191—Malagarazi river, 193. *Southern, or Direct Road*, 194—*Races*; the Wakimbu, 195—the Wanyamwezi, 196—dress, weapons, &c., ceremonies, 198—peculiarities as regards unmarried girls; disposal of dead, 199—domestic interiors, 200—*Iwanza*, or separate public halls for the sexes, 201—clay-chewing, 202—commerce; government, 203—cruel practices on illness of a chief, 204.

Chap. VII. *The Fifth Region; the Valley of Uvinza and Ujiji, upon the Tanganyika Lake*, 205—fertility and insalubrity, 206—seasons and rain, 207—many lines of road; the southern shut up by the Wavinza. *Jambeho*, or trunk line, 207—the Malagarazi road, 208—ferry boats; Mpete, 209—Jambeho, 210—Ruguvu, or Luguvu river, 212—Ukaranga, on the borders of *Tanganyika*, 213—first view of the lake; Ruche river, 214—Ukaranga, the Mucaranga of Portuguese writers, 215—Ujiji, recapitulation of the marches, 217—Ujiji, 218—fertility; the plantain, 219—palm-oil; bazaar, supplies; fauna, 220—slave trade, 221—*Tribes*: the Wajiji, 221—tattooing, clothing, 222—mode of taking tobacco, 223—manners and morals, 224—the Sultan; exorbitant exactions, 225—prices, 226—desertion of porters, 228—the Wakaranga; the Wavinza; Watuta, 229—Wabuha, and Walha, 230, 231.

Chap. VIII. *The Tanganyika Lake.* Previous rumours and confusions about the lakes of this part of Africa, 231—ignorance and flippancy of some reviewers, 232—names ascribed: Zembre, Maravi, Hemosura, &c., 233—

BURTON.

first appearance of the real name, Tanganyika; its meaning, 234—estimated dimensions; altitude, 235—freshness of the water, 236—affluents, whether it may be without exit, 237—winds, storms, and alleged tides, 238—navigation, canoes, tracks followed, 240—difficulties of a start; fishing, 242—fish, 243—shellfish; *voyage to Insigazi* and Island Kiriva, 244—Kasenge, 246—*voyage northward*: Kigari, 247—Wafunya, 248—Island of Ubwari, 249—Muriyumba 250—the Wabembé, anthropophagi; Uvira, 251—refusal of crews to go to the extremity of the lake; people and trade of Uvira, 252. *Periplus of the lake*, from information, 253—Urundi, kingdom and people; Uzige, 254—Uvira; Ubembe; Ugoma; Uguluha, 255—route of trade to Uruwua nine long stages from the lake in a south-westerly direction, this being the extreme point of trade from Zanzibar, 255—the Wathembwe and Wakatete, 256—Marungu; distance to Usenda of the Kazembe sixteen stages; people of Marungu, 258—Ufipa; Wat'hembe, 259—Watongwé.

Chap. IX. *Usukuma, and the Nyanza or Ukerewe Lake*. Explanation of Usukuma applied to the region north of Unyamwezi, 259—Captain Speke's journey from Kazeh, 260—climate, 261—iron; vegetable products; cattle, 262; wild animals; route from Unyamwezi, 263—Unyambewa, 264—Umunda, 265—Superstitions, 266—Urma, 269—Mwanza and the Nyanza lake, 270—Mahayya, King of Mwanza; the lake, 271—confusions with Nyassa, &c., 272—excellence of the water, 274—islelands or peninsulas of Mazita and Ukerewe, Arab traders, 275—probability of Nyanza's feeding the Nile, 276, 277—tribes about Nyanza; Wahinda, 277.

Chap. X. *The Northern kingdoms: Karagwah, Uganda, and Unyoro*.—This from oral information only, 279—superiority of the races in those kingdoms, 280—Uganda and the route thither; Usui, 281—kingdom of Karagwah, 282—speculations as to Lunar Mountains, &c., 283—climate, cultivation, *pombe* (beer), plaitain-wine, wild coffee, &c., 285—people, two orders, Wahuma and Wanyambo, female corpulence, dress, weapons, &c., 286—Armanika, the Sultan, 287

BURTON.

—government; iron, 288—the pastoral Watosi, 288—the Kitangure river, 289—Uganda and its capital, Kibuga, 289, 290—Suna, the late powerful chief, 291—his names, 293; and domestic policy; chief officers; punishments, 294—encouragement to Arab merchants; narrative of one Snay bin Amir; the people, 296—products; beyond Uganda the Kivira river, and Usoga; Unyoro dependent, 290—independent, 297—the Wanyoro people.

Chap. XI. *The Southern Provinces: Ubena, U'ungu, and K'hokoro*. Utakuma, or Southern Unyamwezi, 298—routes from Kazeh; route to Ubena; Nguru, 299—Unyangwira; Usenga, and Usanga; Kiwere, 300—tribes, the Wakimbu, Wahehe, and Warori, 301—Ubena, 302—*Route to U'ungu*, 304—the Wa'ungu; *Routes to K'hokoro*, 305—the Lake Rukwa, or Ikwa; the Rwaha river, 306, or Rufiji—first accounts of it; errors, 307.

Chap. XII. *Sketch of the Ethnology and Physiology, the Dress and Ornaments, of the various Tribes extending from the Coast of Zanzibar into Central Intertropical Africa*. Great South African family, 308—Subdivision into Western, Eastern, and Southern; the Eastern or Zangian races, 309—characteristics and varieties; want of fecundity, 311—superior and inferior tribes, 312—cannibalism; physique and countenance, 313—women; cranium, 314—skeleton, hair, colour, 315—tattooing, 316—effluvia, 317 hair, beard, &c., 318—hairedressing, 319—features in detail, 320—longevity, 323—voice, dress, ornamentation, 325—wire coils, 326.

Chap. XIII. *Notes of the Character and Religion of the East Africans; their Slavery, Government, and Polity*. Want of capacity for improvement, 328—open selfishness, 329—inhospitality; greed, and improvidence, 330—falsehood; stubbornness, 331—vengefulness, inhumanity, rage, tears, 332—combateness and caution; destructiveness, 333—marriage and relations of sexes, little family affection, 334—want of constructiveness; voracity; drinking bouts, 335—rudeness, 336—curiosity, intellect, characteristics of different tribes, 337—to be dealt with as foes, 338—degradation caused by slave trade; fetishism;

BURTON.

supposed evidences of native belief in immortality, 341—witchcraft, 342—divination and rainmaking, 344—exorcism of disease, 345—Devil's trees; other spells, 346—phantasmata; black magic, 347—ordeals; the Myanga, or Rain-doctor, 348—circumcision, 350—slavery and slave trade, 350-358—government, 358—the despotic; the semi-monarchical, 359—legitimacy, 360—succession by sister's son exceptional; punishments; revenue, 361.

Chap. XIV. *Village Life in East Africa*. Comfortable condition of the African peasant, 362—daily habit; food the great matter, 363—milk, 365 butter, 366—oil; *pombé*, or beer; honey, 368—dances, 369—music, 370—instruments; the *zézé*, or banjo; the *kinanda*, or dulcimer, 371—wind instruments; the drum, 372—drinking bouts; the chase, 373—elephants; weapons, 376—spear; javelin, 377—the bow; the arrow; the knoberry, or mace, 379—the dagger, 380—the battleaxe; shields; fire-arms; swords, 381—the arts; weaving; iron, 382—copper, 383—pottery; gourd pottery, 384—pipe-heads; baskets and mats, 385—basts and fibres, 386—diseases, 387—medicine, 389—the *Mganga*, or medicine-man.

Chap. XV. *Cattle, Cultivation, and Caravans in East Africa*. Herds on the Pangani, 390—and Usagara mountains, 391—customs; goats, 392; asses; the horse cannot be acclimatised, 394—poultry; ducks, 395—pigeons; dogs; agriculture, 396—cereals; oilseeds, 399—earth-nuts, 400—pulses; manioc, 401—sundry vegetables, 402—mushrooms, 403—red pepper, 403—cotton, 404; tobacco.

Travelling in East Africa, 405—caravans, 407—portage; the march, 413—the porters, 415—various accommodations, 417—the afternoon march, 419—rate of marching, 420.

Chap. XVI. *Commerce, Imports and Exports*.—Imports, 421—"domestics," or unbleached sheeting; indigo-dyed cotton, 423—bead trade; the measures, 424—and kinds of beads, 425-7—brass wires, 427—minor items, 428—coloured cloths; woollens, 429—cotton cloths; silk and cotton mixed, 431—silks, 432—minor and local items of importation; staples of

BUSSORA.

the internal trade, 434; Salt. *Exports*—Copal, 435—the tree; the gum, 436—the true article is fossil, being the product of extinct forests, which has been bitumenized under the soil, 437—details of quality and locality, 437-440—mode of digging, 440—ivory, 441—three qualities recognised at Zanzibar, 443—Hippopotamus teeth, 444—Rhinoceros horns, 445—black cattle; corn measures used by Banyans at Zanzibar, 446—timber, 447—some vegetable products; orchella, 448—cowries; minor sundries, 449—conclusion.

Itineraries, with Latitudes, Longitudes, and Altitudes.—Zanzibar to Ujiji, 450—Ujiji back to Unyanyembe, 452—Kazeh to Lake Nyanza, 453—Ugogi to Zungomero; Zungomero to *Kouduchi*, on sea coast, 454.

HOPKINS.

HOPKINS, THOMAS, On the CAUSES of the MILD WINTER TEMPERATURE of the BRITISH ISLANDS, xxvii. 206—Popular view of the effect of Gulf-stream questioned, 206-208—influence of cold winds in reducing temperature, 209—cause of cold winds; warming influence of a moist atmosphere, 212—instances; superior warmth of British Islands due to condensation of vapour, 218—corroborations, 218-220.

—, On the FINE REGIONS of the TRADE WINDS, xxviii. 362

—Trade winds traced back from elevated land, forming areas of condensation, towards which they blow, to the parts where they rise and where fine weather prevails; condensation in Australia causes South Pacific trade; this, near its origin, from Juan Fernandez to the Equator is mild and steady; to north of the Equator, 363—though mild, these winds cover great space, whence is the air supplied? The Hadleian theory gives no satisfactory answer, 364—answer on the theory of ascending atmospheric currents produced by condensation; best evidence as to the immediate source of the supply of air to be derived from its degree of dryness, 365—on this correct observations desirable, 366—some evidence afforded, 366-7—fall of dust recorded by Darwin at Cape Verde Islands when Harmatan wind blew from Africa, but the author seeks the source of it in ascending currents from the Andes passing eastward to feed the lower wind from that quarter, 368—also on the Indian Ocean the season of the south-west monsoon is fine in the Mozambique Channel, its place of origin, 369—here the immediate source of the air feeding the monsoon is unknown; further remarks as to the movement of masses of air, ascending over areas of condensation, losing their vapour and descending elsewhere as the origin of dry winds, 370-371.

D., Extract of Letter from, dated Kolobeng, 24th August, 1850 (containing account of his second visit to Lake Ngami), xxi. 18—the chief Sechele's anxiety to visit Sebotoane and Sekhomo, 19—the Bakalahari; the Bakarutse; cross the Zouga River; the *Tsetsé* Fly; visit the Lake; obliged by fever and fly to return, 20—the malaria; necessity for a passage to the sea, 21—obstruction by the Boers, 20, 21—Livingstone's plans; information as to lake or marsh to the northward;

LIVINGSTONE.

the Teoge River; other rivers and tribes on their banks; fish in the Zouga, 22; crocodiles, hippopotamuses; mode of fishing; trees; ban-yans; palmyra; baobab; other vegetable productions; pitfalls; elephants, 23—other animals; Kalahari Desert and people; mode of obtaining water; Bushmen of the Desert; Botletlé; animals, 24—the eland; salt-pans; desiccation of the country in progress.

LIVINGSTONE, REV. DR. D., and W. C. OSWELL, latest explorations into CENTRAL AFRICA BEYOND LAKE NGAMI, xxii. 163.

Narrative starts from 'Nchokotsa, S.E. of Lake Ngami; salt-pans; springs called Matlomaganyana, or the Links, 164—superior Bushmen; the *Mopané* tree, and its insect used as food; excessive drought; reach Bakoba villages on Mahabi River; the *Tsetse*; reach the Chobé, 165—Sebitsano, great chief of the region, his history; dies during their stay; succeeded by his daughter, 166—ride on to the great River Sesheke; return towards the colony.

Region governed by the Makololo; swamps and great perennial rivers, 166-7—the Chobe and Sesheke and their floods; trees, baobab, date, palmyra; others bearing edible fruits; crops raised; earth-bean, sugar-cane, sweet-potato, &c., 168—moist soil; inroads of Mosikelatse; sources of the rivers; obscure information as to upper course; great falls reported below, 168; black tribes of the country, 169—their linguistic relations, 170; their arts; custom of knocking out upper incisors; introduction of slave-trade; reported great lake, 171—abundance of elephants and waste of ivory: the *Tsetse* fly, and effects of its bite confined to domestic animals, 172-3—Extract of letters from Livingstone and Capt. Parish, 173.

Explorations in the INTERIOR OF AFRICA, xxiv. 291.

Fever Ponds; formidable reeds of the Chobé, 292—Linyanti, 293—Zambese or Leambye River; savagery, what it is; slave-trade, 294—executions; ascent of the Zambese, 295—Falls of Gonye; artificial sites of villages, 296; Barotse a region of plenty, but unhealthy; native

LIVINGSTONE.

remedies for fever; the *tsetse*, 297—the Leeba River; the chief Santuru, and his memorials; native view of a halo round the sun, 298—slave-merchant's stockade; Pereira's course, 299—Arabs who had crossed the continent, remarks on astronomical observations, abundance of game, and rumours of new animals, 300—birds: table of observations, 301—letter from Mr. Maclear to Sir John Herschel regarding these; more observations, 302—notes by Mr. Maclear, 303—General remarks on observations.

LIVINGSTONE, REV. DR. D., Do., Do., continued, xxv. 218.

Letter sending Table of Observations.

Narrative Letter to Sir R. Murchison, 219—Sekeletu's country, and neglect of its commerce, 220—abundance of elephants, and mode of killing; descend the Chobé, 221—ascend the Leeba, 222—great difference of the people from the Bechuanas; the chief Shinté; good reception, 223—clearness of the river water, though in flood, and cause, 224—repeated fever; Lake Dilolo; Kasye or Loké River; Balonda country, 225—elevated tableland; Cassange, the extreme Portuguese settlement; and Quango River; country populous and plentiful, 226—exactions attempted; kindness of the Portuguese, 227—arrival at Loanda, 228—Mr. Gabriel's kindness; proposed return and journey to the eastern coast.

On the Province of Angola, 229—vegetable products, 230—Cassange, 231—Ideal Section of the country, 232—geological notes, 233—government; convict garrison; diffused instruction, 234—commerce; the Kasye and Quango, said to from the Congo, 235.

Letter from Mr. Gabriel at Loanda to Lord Clarendon, 235—reports Dr. Livingstone's return as far as Cabango, 236—his sufferings on the road.

Mr. Gabriel to Consul Brand, 237.

Do., Do., xxvi. 78.

Letter from Mr. Maclear to Sir R. Murchison.

Letter from Livingstone to Sir R. Murchison regarding his observations, &c., 80.

LIVINGSTONE.

Table of Results of Observations from the Leeba to Angola, 82.

LIVINGSTONE, REV. DR. D., Explorations in the INTERIOR OF AFRICA, xxvii. 349.

1. *From Cabango to Linyanti, &c.*

Rate of travelling, 350—proposed journey to residence of Matiamvo abandoned; lake with double outlet, 351, 352—remarks on formation of Interior Africa; basin form, 353-355—gradual desiccation of Bechuana country, 356—good behaviour of the Makololo; use of commerce in breaking up the isolation of heathenism, 357.

2. *From Linyanti to the Falls of Victoria, and along the Zambesi to Tete, &c.*

Kindness of Sekeletu, 358—the “smoke-sounding” falls of Zambesi, 358-62—eastern ridge of the basin, 365—probability of sanitarium on these ridges, 366.

3. *On the People of South Africa, &c.*

Caffre people of the eastern hilly regions, 367—the Bechuana more towards the centre, 368—the Hill Bechuana very superior to those of the desert, who approach Australians; the real Caffres or Zulus, 369—the Bushmen; Bayeiye or Bakoba; identical structure of language in all the tribes, 370—the Bushman perhaps no exception; the Bible in Sechuana, 371—three new antelopes; larger development of animals in the temperate than in the equatorial regions; elephants on the Zambesi; treatment of the traveller on the Zambesi; hopes for the perpetuity of the African race, 372—previous attempts to cross the continent, 373—José de la Rosa; Dr. Lacerda; Pedro João Baptista and Antonio José; Arabs from eastern coast to Loanda; Livingstone's conclusion, 374.

4. *On the Lower Part of the Zambesi.*

Morumbala Mountain, with hot sulphureous fountain on its summit, 375; the Zambesi at Tete; navigation, 376-377—Quilimane, its insalubrity, 378—coal, iron, 379—gold, agriculture, 380—the slave-trade, 382—effect of the British cruisers, 384—Lupata and its real height, 385—Sofala, 386.

5. *Relates arrival at Quilimane, and at Mauritius, 386-7.*

PETERMANN.

- son, Barth, and Overwegg, xxi. 130. See *African Missions*.
 PETERMANN, Augustus, Letter to, from Dr. Vogel, xxiv. 276. See *African Missions*.
 ———; Notes on the Distribution of Animals available as Food in the ARCTIC REGIONS, xxii. 118—bearing on fate of Franklin's Expedition, 118—notation that animal and vegetable life regularly diminish with ascending latitude, a fallacy, *ib.*—definition of regions containing Arctic fauna, 119—mammals, birds, and fishes, in size and numbers will bear comparison with the tropics (not in number of *species*), *ib.*—a great variation in abundance in different parts of the Arctic region, 120—enormous harvest of the Russian Fur Company in America, *ib.*—prodigious number of whales north of Behring Strait, 121—immense abundance of animal life in Kolyma District of Siberia, 121—less abundant in Western Siberia, Novaia Zemlia, and Spitzbergen; causes of varied distribution, 121—the summer temperature the regulator of amount of life, *ib.*—lowest mean July temperature in American Arctic regions, 122—in Asiatic ditto, 124—Pole of cold in the Northern hemisphere, is Winter Island, which is also the Pole phytologically, 124—bearing on Franklin's Expedition, 124, 125—tables of thermometrical observations in Arctic regions according to latitude, 126.
 ———; On Sir J. FRANKLIN, the Sea of SPITZBERGEN, and the WHALE-FISHERIES, xxxiii. 129—Belcher, Maclure, and Inglefield's searches only comprise one-third of the tract in which Franklin must have been arrested, 130—the remaining part which the author deems most important is unsearched; desires to draw attention to the Arctic Sea directly north of us; the Dutch settlement of Smeerenberg, on Spitzbergen, in the seventeenth century; proposed nomenclature, *Sea of Greenland*, *Sea of Spitzbergen*. The latter the easiest opening towards the Pole, and not ice-barred, 131—Scoresby's evidence; Beechey's; that of Mr. Crowe, Consul at Hammerfest, 132—prejudice dates from Wood's voyage in 1676; his failure and misrepresentations, *ib.*—as Beechey shows,

PETERMANN.

133—no ice met up to Bear Island; yet no suitable expedition has tried this direction, 134—probably a new rich whale-fishery would be opened out; and the Americans will take advantage, if England does not; the achievements and slight cost of Parry's boat-voyage show what might be done with steam on the same route, 135.

Postscript.—Extracts of Letters from captains of whalers and others, testifying to open water east of Spitzbergen, 135, 136.

- RINK, Dr. H., of Copenhagen. On the large CONTINENTAL Ice of Greenland, and the origin of Icebergs in the

RINK.

Arctic Sea, xxiii. 145—downward movement of ice masses or glaciers, *ib.*; lowest level of such ice-transport in Alps, and in Greenland, 146—and Icebergs and their mass; general opinion that they have been detached from glacier valleys, 147—yet no one has mentioned seeing the actual detachment of large masses; nor accounted satisfactorily for the rarity of Icebergs at Spitzbergen abounding in glaciers, *ib.*; the author's opportunities of observation; his deductions. The vast masses of ice issuing from limited spaces of coast are supplied by yearly increase of ice over a large tract and not merely by the ravine from which the glaciers proceed; iceberg formation therefore requires a tract of land with concentration of drainage, 148—an inland movement thrusts the ice forward in the course of the obliterated river-bed into the sea; space for the generation of large icebergs on these principles is only found in the broader part of Greenland, *ib.*; character of the West Greenland coast; deep friths, islands and peninsulas form the outskirts terminating on a continent covered with a continuous table of ice 800 miles in breadth, 149—details of phenomena, 150—*calf-ice*, *ib.*; inland ice-table, 151—principal ice-friths of the coast named, 152—the ice protruded far along the sea bottom before it *calves*; icebergs therefore rise out of the sea rather than break from the coast, *ib.*; motion of the ice-currents inland, 153—structure of iceberg ice, *ib.*—154.

RINK, Dr. H., of Copenhagen. On Dr. KANE's supposed discovery of the NORTH COAST of Greenland and of an OPEN POLAR SEA, xxviii. 272—doubtful theories in Dr. Kane's book; the Humboldt Glacier, one of the usual Greenland icefords, 274—the open Polar Sea; Petersen's account of it; probably a mere "stream-hole," 275—doubts about lands laid down from such cursory observation; quotation of Kane's views of interior ice of Greenland, 276—their hastiness and unfounded character, 277—further criticisms; small basis for the theory of the open sea, 280–286—criticisms on the detailed coast-lines represented, 286—a valuable work injured by these too ambitious appendages, 287.

STRACHEY.

GEOGRAPHY of WESTERN TIBET, xxiii. 1.

Names of the country and people, Tibet, Bod, Bhot, Hun, &c.; Tibetan names for China, India, Russia, &c., *ib.*—for adjoining provinces, 2—Eastern Tibet not included in this paper; Bod or Central Tibet and its subdivisions; Lhasa, Tashi, Lhumpo, 3—Nari, or Western Tibet, and subdivisions, 3, 4—countries n.w. and n.e. of Nari almost unknown; Tibet extends to borders of Gilgit, 5—northern slope towards Khotan, 6—Chinese-Turkish provinces of Kashgar, Yarkand, and Khotan, *ib.*—lawless tribes Khampa (nomads) or Rundur north of Central Tibet, *ib.*—*General River System*; the rTachok Tsangspo (Horse River), supposed Brahmaputra, 7—Senge Tsangspo (Lion River), the chiefs of Indus, *ib.*—Langchen Tsangspo (Elephant River), or Suttlej, 8—hydrographic position of Western Tibet in regard to whole breadth of Middle Asia, *ib.*—the great South Asiatic watershed; main watershed not identical with crest of great Himalaya range, *ib.*—penetrating valley heads; general character of the Tibetan table, 9—transverse watershed dividing rTachok from Lanchen and Senge unvisited, *ib.*

West Nari in detail, 10—European exploration, *ib.*—length; breadth uncertainly known; approximate area, 11—general division into Nari-Khorsum and Mariyul, *ib.*—their great characteristics. *Geographical Subdivisions*, Khorsum ("Three Tracts"), divided into Ruduk, Guge, Purang, and a fourth, Gar, 12. Subdivision of Purang; of Guge, 13—of Ruduk, *ib.*—Mariyul ("The Low Country"), now Ladak, and Balti. The last Mahomedan. Ladak, its subdivisions, *ib.*—Zangskar, 14, and sPiti (British). Balti and subdivisions, *ib.*

CLASSIFIED LIST OF THE TIBETAN PROVINCES AND SUBDIVISIONS, 15.

Natural divisions by Tibetan geographers into *Lhogyt* or South Lands, *Zhunglam* or Midway, *Changyut* or North Lands, 16—vertical formation of the table-land, *ib.*—alluvium, 17—and its apparent history, 18—fossil mammalia, 19—some geological facts, *ib.*—and impressions as to upheaval, &c., 20.

Natural classification of Table-land

STRACHEY.

into Rong (warm valleys containing such) and Changlang ("northern plains," high and cold pastures), 21 — Distribution of the country between these two, 21, 22. *Mountains* of West Nari, general plan, 23—longest ascertained ranges, 24—height of various ranges. Capt. R. Strachey's measurement of peaks in Khorsum, 25—passes and their heights, *ib.*—no native names for ranges, 26. *Valleys*; general sketch, *ib.*—longest instances of flat bottom, 27—breadth, 28—contracted gorges in the Rong, 29—valleys of Ladak, *ib.*—lowest depressions, 30—elevations, remarkable flatness of main valleys, 30.

Great alluvial Plateau of Guge, 31-33.

Mean Elevation of Table-land, 33. *Rivers*, 34—mode of naming, *ib.*—mythological names of the great rivers, *ib.*—sketch of the drainage, 35—table with estimated areas of basins, 36—watersheds; direction of principal rivers, 37—approximate lengths of principal rivers, 37-40—volumes, 40-44—fall of rivers, with a table, 44, 45.

Lakes, 46—the Pangong, *ib.*—its saltiness, 47—Tso Rul and Tso Shaldat, *ib.*—lakes of south-east Nari, the Konkyu, Mapham (Manusarawar), and Langak (Rawan Rad), 48-50—the Tso Moriri, 50—distomosis of a river, *ib.*—lakes of North Rupshu, 51—small fresh-water lakes, 52.

Glaciers, 52—chief reservoir on south face of Turkish watershed, 53—glaciers of Kumdan, *ib.*—permanent beds of frozen snow below the ordinary snow-level, 54. *Debacles* in the great valley of the Mariyul changyut, 55-57—not connected with Indus floods in the plains, 57. *Subterranean*, 57—hot springs, 58—earthquakes, *ib.* *Climate. Temperature*, great diversities, 58—winter climate at Lé; freezing of the rivers, 59—summer temperature, *ib.*—climates of greater elevation, 60—freezing of the salt lakes, 61—some inferences as to temperature in highest accessible elevations, 61—great heat of sun's rays, 62—attempted experiments to ascertain temperature of earth at Lé, &c., 63—mean temperature of Central Ladak, 63.

Barometric pressure, 64. *Winds*, *ib.* *Clouds*, 65. *Moisture*, *ib.*—extra-

STRACHEY.

ordinary dryness of Ladak, 66—snow-falls, *ib.*—rain, 67—form of snow in Ladak, *ib.* *Electricity*, absence of thunderstorms, 67. *Snow-line*, 68-69.

STRACHEY, Capt. Henry, xxi. 58, 62, 64, 70, 77, 79—Patron's Medal awarded to, and short account of his explorations in Tibet, xxii. pp. lviii., cvii.—services to Himalyan geography, xxviii. p. clxxxvii.

—, CAPTAIN RICHARD, B.E.; On the Physical Geography of KUMAON and GURHWAL in the HIMALYA, and of adjoining parts of Tibet, xxi. 57.

Correctness of Humboldt's views as to the formation of Central Asia; the high lands of its southern border the subject of this paper; limits of this high land, 58—general character as a great protuberance from earth's surface; the author's remarks specially refer to the provinces named above; *Configuration of Surface*, 59—Plain of India; Siwalik Hills; *Dûns*; *Tarai*, 60—mountain region; great peaks, 61—valleys; passage into Tibet and its plain, 62—this elevated plain; the vast ravines cutting it; lakes; Rakas Tal and Manasarowar, 63—source of Sutlej; of Indus, 64—of Ganges; of Brahmaputra; systems of drainage, 65. *Geology*; parallelism of feature; strike and dip of strata, 66—Siwalik Hills; central region; silurian strata; muschelkalk and oolite, 67—tertiary plain of Tibet; fossils; eruptive rocks of Tibet, 68—physical unity of Tibet with the Himalya; *Meteorology*, 69—importance of inequalities on earth's surface in relation to height of the atmosphere; perpetual snow; snow-line on south face; on the north; probable cause of difference, 70—trifling falls on the high plain; production of excessive rain on windward faces of mountains in tropics; glaciers, 71—motion; ancient extension; ancient moraines, 72; corroborative facts; climate; botany, 74—tropical zone; temperate, 75—upper forest region, 76—alpine; Tibetan plain, 77—limit of vegetation; agriculture, 78. *Zoology*, 79—of Tibet; Yak; wild sheep; birds, &c.; Yak mule, 80—ponies; *Ethnography*; Hindu tribes, 81—Khasiyas; polyandry, 82—language; history; mixed races, 84—Tibet; the term Hiundes, 85.
